

Laravel CIA Practical

Question 1

CRUD Operation for Employees Table with Validation

Question:

Design and develop a CRUD (Create, Read, Update, Delete) application for managing employee records using Laravel.

Table Structure: employees

Field Name	Data Type	Constraints
id	BIGINT	Primary Key, Auto Increment
name	VARCHAR(100)	Not Null
email	VARCHAR(100)	Unique, Not Null
phone	VARCHAR(15)	Not Null
designation	VARCHAR(50)	Not Null
salary	DECIMAL(10,2)	Not Null
created_at	TIMESTAMP	Nullable
updated_at	TIMESTAMP	Nullable

Requirements:

1. Create migration and model for the employees table.
2. Implement CRUD operations:
 - Add new employee
 - Display all employees
 - Edit employee details
 - Delete employee
3. Apply **validation rules**:
 - name: required, minimum 3 characters
 - email: required, valid email, unique
 - phone: required, numeric, 10 digits
 - designation: required
 - salary: required, numeric, minimum 0
4. Display appropriate **custom validation error messages**.
5. Use resource controller and proper routing.

Question 2:

CRUD Operation for Products Table with Validation

Question:

Develop a Laravel-based CRUD application to manage product details with proper validation and error messages.

Table Structure: products

Field Name	Data Type	Constraints
id	BIGINT	Primary Key, Auto Increment
name	VARCHAR(150)	Not Null
description	TEXT	Nullable
price	DECIMAL(10,2)	Not Null
quantity	INT	Not Null
category	VARCHAR(100)	Not Null
created_at	TIMESTAMP	Nullable
updated_at	TIMESTAMP	Nullable

Requirements:

1. Create migration and model for products table.
2. Implement full CRUD functionality:
 - Create product
 - View product list
 - Update product
 - Delete product
3. Apply validation rules:
 - name: required, minimum 3 characters
 - description: optional
 - price: required, numeric, greater than 0
 - quantity: required, integer, minimum 1
 - category: required
4. Show **user-friendly validation messages**.
5. Use Blade templates for UI and resource controller.
